Columbia University School of General Studies offers the following majors and concentrations. Students at GS must complete a major to receive a bachelor's degree.

## Concentrations

Students may also wish to pursue a concentration, which is optional and provides students the opportunity to develop in-depth knowledge in a secondary field. Most academic departments offer both a major and a concentration.

A few areas of study, which are marked with an *, are offered exclusively as concentrations.

- African-American Studies
- American Studies
- Ancient Studies
- Anthropology
- Applied Mathematics
- Archaeology
- Architecture
- Art History
- Art History and Visual Arts
- Astronomy
- Astrophysics
