

ARTIFICIAL INTELLIGENCE

The Computer Science Department:

Department website: <http://www.cs.columbia.edu>

Office location: 450 Mudd

Office contact: ug-advising@cs.columbia.edu

Director of Undergraduate Studies: Dr. Jae Woo Lee, 715 CEPSR;
212-939-7066; jae@cs.columbia.edu

Undergraduate Administrator: CS Advising, ug-advising@cs.columbia.edu

The Computer Science Major

Students study a common core of fundamental topics, supplemented by a program of six electives that provides a high degree of flexibility. Three of the electives are chosen from a list of upper-level courses that represent area foundations within computer science. The remaining electives are selected from the complete list of upper-level computer science courses. Students are encouraged to work with their faculty advisor to create a plan tailored to fit their goals and interests. The department webpage provides several example programs for students interested in a variety of specific areas in computer science.

Our website is always the most current in terms of information and has many FAQs for students. Please view this here: cs.columbia.edu and contact ug-advising@cs.columbia.edu with any questions.

Student Advising

Consulting Advisers

Undergraduate students will be assigned a CS Faculty Advisor from the list on the CS website - <https://www.cs.columbia.edu/education/undergraduate/advisors/>. Students will typically have the same advisor throughout their time in the program. However, students are encouraged to check this list at the start of every term to ensure their advisor remains the same. To reach out to your CS Faculty Advisor, please email first or visit during office hours.

Enrolling in Classes

Computer Science Department courses are needed by many student populations and are in high demand. To facilitate all COMS students getting the courses they need and distribute seats fairly, please refer to our policy - <https://www.cs.columbia.edu/cs-course-registration-policy/>

Preparing for Graduate Study

The department offers a number of options at the graduate level, including the MS Express. Please refer to our FAQs - <https://www.cs.columbia.edu/education/admissions8/> - or email ms-admissions@cs.columbia.edu with any questions.

Coursework Taken Outside of Columbia

Advanced Placement

The department grants 3 points for a score of 4 or 5 on the AP Computer Science A exam, along with an exemption from [COMS W1004](#) Introduction to Computer Science and Programming in Java. However, we recommend that you take COMS W1004 before taking COMS

W3134/W3137 Data Structures if you received a score of 4 or have not programmed in Java recently.

Barnard College Courses

Any course offered by the Computer Science @Barnard department can count towards degree requirements. Please refer to the major and minor program information pages for specific information.

Transfer Courses

Major: Up to four transfer courses are accepted toward the major. Calculus, linear algebra, and probability/statistics courses can be transferred in addition to the four-course limits.

Minor: Up to two transfer courses are accepted toward the minor. A transfer course in linear algebra or probability/statistics counts as one of the two allowed transfers.

Each course must be approved as equivalent by the faculty who teaches it at Columbia and must have been passed with a B grade or higher. Please refer to the guide here - <https://www.cs.columbia.edu/education/undergraduate/#sec8>

Study Abroad Courses

If you are considering studying abroad, please consult with the CS Advisor as soon as possible. Each course for potential incorporation into your CS major or minor must be approved as equivalent by the faculty who teaches it at Columbia.

Summer Courses

Any Computer Science or approved cognate course offered during the summer session will count towards the degree, with the exception of online-only courses, which do not count towards degree requirements.

Undergraduate Research and Senior Thesis

Undergraduate Research in Courses

COMS W3998 UNDERGRAD PROJECTS IN COMPUTER SCIENCE.

1.00-3.00 points.

Prerequisites: Approval by a faculty member who agrees to supervise the work.

Independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit. Consult the department for section assignment.

COMS W4901 Projects in Computer Science. 1-3 points.

Prerequisites: Approval by a faculty member who agrees to supervise the work.

A second-level independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit, but not for a total of more than 3 points of degree credit. Consult the department for section assignment.

Senior Thesis Coursework and Requirements

A thesis is not a requirement for the major or minor.

COMS W3902 UNDERGRADUATE THESIS. 0.00-6.00 points.

Prerequisites: Agreement by a faculty member to serve as thesis adviser. An independent theoretical or experimental investigation by an undergraduate major of an appropriate problem in computer science carried out under the supervision of a faculty member. A formal written

report is mandatory and an oral presentation may also be required. May be taken over more than one term, in which case the grade is deferred until all 6 points have been completed. Consult the department for section assignment

Undergraduate Research Outside of Courses

Laboratory Facilities

The department has well-equipped lab areas for research in computer graphics, computer-aided digital design, computer vision, databases and digital libraries, data mining and knowledge discovery, distributed systems, mobile and wearable computing, natural language processing, networking, operating systems, programming systems, robotics, user interfaces, and real-time multimedia.

Research labs contain several large Linux and Solaris clusters; Puma 500 and IBM robotic arms; a UTAH-MIT dexterous hand; an Adept-1 robot; three mobile research robots; a real-time defocus range sensor; interactive 3-D graphics workstations with 3-D position and orientation trackers; prototype wearable computers, wall-sized stereo projection systems; see-through head-mounted displays; a networking testbed with three Cisco 7500 backbone routers, traffic generators; an IDS testbed with secured LAN, Cisco routers, EMC storage, and Linux servers; and a simulation testbed with several Sun servers and Cisco Catalyst routers. The department uses a SIP IP phone system. The protocol was developed in the department.

The department's computers are connected via a switched 1Gb/s Ethernet network, which has direct connectivity to the campus OC-3 Internet and internet 2 gateways. The campus has 802.11b/g wireless LAN coverage.

The research facility is supported by a full-time staff of professional system administrators and programmers.

Participating in Research Projects

Students can reach out to professors whose research areas are of interest to them. Professors will typically require that students have completed the relevant coursework covering the background knowledge and skills.

Once a faculty member agrees to supervise the student's research work, the student will register for the professor's section of COMS W3998 or W4901.

COMS W3998 UNDERGRAD PROJECTS IN COMPUTER SCIENCE.

1.00-3.00 points.

Prerequisites: Approval by a faculty member who agrees to supervise the work.

Independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit. Consult the department for section assignment

COMS W4901 Projects in Computer Science. 1-3 points.

Prerequisites: Approval by a faculty member who agrees to supervise the work.

A second-level independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit, but not for a total of more than 3 points of degree credit. Consult the department for section assignment.

Department Honors and Prizes

Department Honors

The Computer Science Department does not award departmental honors.

Academic Prizes

Jonathan L. Gross Award for Academic Excellence: This award was established in 2017 in honor of the much loved Professor Emeritus Jonathan Gross. Each year a cash gift is awarded to one graduating masters student and to one graduating senior from each of the four undergraduate schools served by the Department of Computer Science.

Theodore R. Bashkow Award: Presented to a computer science senior who has excelled in independent projects. This is awarded in honor of Professor Theodore R. Bashkow, whose contributions as a researcher, teacher, and consultant have significantly advanced the state of the art of computer science.

Andrew P. Kosoresow Memorial Award for Excellence in Teaching and Service: Awarded for outstanding contributions to teaching in the Department of Computer Science and exemplary service to the Department and its mission.

Computer Science Scholarship Award: A cash prize awarded to two B.A. and two B.S. degree candidates for outstanding academic achievement in computer science.

Russell C. Mills Award: This annual award, established by the computer science department in 1992 in memory of Russell C. Mills, is a cash prize given to a computer science major who has exhibited excellence in the area of computer science.

Other Important Information

See the Requirements section for the policies on double counting and D grades.

Guidance for Undergraduate Students in the Department

Program Planning for all Students

The following requirements are new as of the academic year 2023-2024. Students who declared a CS major in the academic year 2022-2023 or earlier have the option to follow the old requirements. The old requirements are noted on [the Undergraduate Programs pages](#) of the Computer Science Department website (<https://www.cs.columbia.edu/education/undergraduate/>).

Please note that the information on the department website is more up-to-date than the information in the archived Bulletins. Students with questions about which requirements to follow are advised to talk with ug-advising@cs.columbia.edu.

Course Numbering Structure

The first digit indicates the level of the course, as follows:

0 Course that cannot be credited toward any degree

1 Undergraduate course

2 Undergraduate course, intermediate

3 Undergraduate course, advanced

4 Graduate course that is open to qualified undergraduates

6 Graduate course

8 Graduate course, advanced

9 Graduate research course or seminar

Guidance for First-Year Students

Pre-Introductory Courses

COMS W1004 is the first course in the Computer Science major curriculum, and it does not require any previous computing experience.

Before taking COMS W1004, however, students have an option to start with one of the pre-introductory courses: ENGI E1006 or COMS W1002.

ENGI E1006 Introduction to Computing for Engineers and Applied Scientists is a general introduction to computing for STEM students.

ENGI E1006 is in fact a required course for all engineering students.

COMS W1002 Computing in Context is a course primarily intended for humanities majors, but it also serves as a pre-introductory course for CS majors. ENGI E1006 and COMS W1002 do not count towards Computer Science major.

Guidance for Transfer Students

Major: Up to four transfer courses are accepted toward the major. Calculus, linear algebra, and probability/statistics courses can be transferred in addition to the four-course limits.

Minor: Up to two transfer courses are accepted toward the minor. A transfer course in linear algebra or probability/statistics counts as one of the two allowed transfers.

Restrictions

Overlapping courses

Students may receive credit for only one of the following two courses:

- COMS W1004 Introduction to Computer Science and Programming in Java
- COMS W1005 Introduction to Computer Science and Programming in MATLAB.

Students may receive credit for only one of the following three courses:

- COMS W3134 Data Structures in Java
- COMS W3136 ESSENTIAL DATA STRUCTURES

- COMS W3137 HONORS DATA STRUCTURES # ALGOL

COMS W1005 and COMS W3136 cannot be counted towards the Computer Science major, minor, and concentration.

No more than 6 points of project/thesis courses (COMS W3902, W3998, W4901) can count toward the major. COMS W3999 Fieldwork cannot be used as a CS Elective.

No more than one course from each set below may be applied towards the computer science major:

- IEOR E3658, STAT UN1201, MATH UN2015
- MATH UN2015, MATH UN2010, APAM E3101, COMS W3251
- COMS W4771, COMS W4721

Double Counting

Double-counting policies are to be construed within the larger double-counting policy of the student's home school. Double-counting policies are detailed on each School's Bulletin and/or Catalog.

The CS department allows the following courses in the CS Core and Mathematics requirement to be double-counted with another major, minor, or concentration. No other courses can be double-counted with another program.

- COMS W1004
- Any calculus courses (including Honors Math A and B)
- One Linear Algebra course
- One Probability/Statistics course

D Grades

A maximum of one course worth no more than 4 points passed with a grade of D may be counted toward the major or minor.

Undergraduate Programs of Study

Major in Computer Science

All majors should confer with their program adviser each term to plan their programs of study. Students considering a major in computer science are encouraged to talk to a program adviser during their first or second year. The Computer Science major is composed of four basic components: The Mathematics Requirement, the Computer Science Core, the Area Foundation Courses, and the Computer Science Electives.

Mathematics Requirement (6-11 points)

Calculus Requirement: Select one of the following courses:

| | |
|-------------|---------------------------------|
| MATH UN1201 | CALCULUS III |
| MATH UN1205 | ACCELERATED MULTIVARIABLE CALC |
| APMA E2000 | MULTV. CALC. FOR ENGI # APP SCI |

Note that MATH UN1201 (Calculus III) requires Calculus I as a prerequisite but does NOT require Calculus II. MATH UN1205 and APMA E2000, however, require both Calculus I and Calculus II as prerequisites.

Linear Algebra Requirement: Select one of the following courses:

| | |
|------------|---|
| COMS W3251 | COMPUTATIONAL LINEAR ALGEBRA (recommended) |
|------------|---|

| | |
|-------------|--------------------------------|
| MATH UN2010 | LINEAR ALGEBRA |
| MATH UN2015 | Linear Algebra and Probability |
| MATH UN2020 | Honors Linear Algebra |
| APMA E2101 | INTRO TO APPLIED MATHEMATICS |
| APMA E3101 | APPLIED MATH I: LINEAR ALGEBRA |

Probability / Statistics Requirement: Select one of the following courses:

| | |
|-------------|--|
| MATH UN2015 | Linear Algebra and Probability |
| IEOR E3658 | PROBABILITY FOR ENGINEERS |
| STAT UN1201 | CALC-BASED INTRO TO STATISTICS |
| STAT GU4001 | INTRODUCTION TO PROBABILITY AND STATISTICS |

NOTE: Math 2015 Linear Algebra and Probability may simultaneously satisfy both linear algebra and probability requirements without the need to take additional classes thus reducing the total number of points required.

Pre-intro course (Optional, 3-4 points)

| | |
|---------------|---|
| ENGI E1006 | INTRO TO COMP FOR ENG/APP SCI (recommended but not required) |
| or COMS W1002 | COMPUTING IN CONTEXT |

Computer Science Core (20-21 points):

First Year

| | |
|-----------------------------|---------------------|
| COMS W1004 or COMS W1007 | PROGRAMMING IN JAVA |
|-----------------------------|---------------------|

Sophomore Year

| | |
|-----------------------------|--------------------------------|
| COMS W3134 or COMS W3137 | Data Structures in Java |
| | HONORS DATA STRUCTURES # ALGOL |
| COMS W3157 | ADVANCED PROGRAMMING |
| COMS W3203 | DISCRETE MATHEMATICS |

Junior and Senior Year

Complete the remaining required core courses:

| | |
|------------|--------------------------------|
| COMS W3261 | COMPUTER SCIENCE THEORY |
| CSEE W3827 | FUNDAMENTALS OF COMPUTER SYSTS |

Area Foundation Courses (9 to 12 points):

Select three from the following list:

| | |
|------------|-------------------------------------|
| COMS W4111 | INTRODUCTION TO DATABASES |
| COMS W4113 | FUND-LARGE-SCALE DIST SYSTEMS |
| COMS W4115 | PROGRAMMING LANG # TRANSLATORS |
| COMS W4118 | OPERATING SYSTEMS I |
| COMS W4119 | COMPUTER NETWORKS |
| COMS W4152 | Engineering Software-as-a-Service |
| COMS W4156 | ADVANCED SOFTWARE ENGINEERING |
| COMS W4160 | COMPUTER GRAPHICS |
| COMS W4167 | COMPUTER ANIMATION |
| COMS W4170 | USER INTERFACE DESIGN |
| COMS W4181 | SECURITY I |
| CSOR E4231 | ANALYSIS OF ALGORITHMS I |
| COMS W4236 | INTRO-COMPUTATIONAL COMPLEXITY |
| COMS W4701 | ARTIFICIAL INTELLIGENCE |
| COMS W4705 | NATURAL LANGUAGE PROCESSING |
| COMS W4731 | Computer Vision I: First Principles |
| COMS W4733 | COMPUTATIONAL ASPECTS OF ROBOTICS |
| CBMF W4761 | COMPUTATIONAL GENOMICS |
| COMS W4771 | |

| | |
|------------|--------------------------|
| CSEE W4824 | COMPUTER ARCHITECTURE |
| CSEE W4868 | SYSTEM-ON-CHIP PLATFORMS |

Computer Science Electives (9 to 12 points)

Any three COMS courses or jointly offered computer science courses such as CSXX or XXCS course that are worth at least 3 points and are at the 3000 level or above. This includes 3000-level courses offered by Barnard CS.

Restrictions

No more than 6 points of project/thesis courses (COMS W3902, W3998, W4901) can count toward the major. COMS W3999 Fieldwork cannot be used as a CS Elective.

No more than one course from each set below may be applied towards the computer science major:

- IEOR E3658, STAT UN1201, MATH UN2015
- MATH UN2015, MATH UN2010, APAM E3101, COMS W3251
- COMS W4771, COMS W4721

Major in Computational Biology

For a description of the joint major in computer science—Biology, see the [Biological Sciences](#) section in this bulletin.

Major in Computer Science - Mathematics

For a description of the joint major in computer science—mathematics, see the [Mathematics](#) section in this bulletin.

Major in Information Science

The major in information science requires a minimum of 33 points, including a core requirement of five courses. Adjustments were made to the course lists below in March 2022.

The elective courses must be chosen with a faculty adviser to focus on the modeling and use of information within the context of a disciplinary theme. After discussing potential selections, students prepare a proposal of study that must be approved by the faculty adviser. In all cases, the six courses must be at the 3000 level or above, with at least three courses chosen from computer science. Following are some example programs. For more examples or templates for the program proposal, see a faculty adviser.

Note: In most cases, additional courses will be necessary as prerequisites in order to take some of the elective courses. This will depend on the student's proposed program of study.

Core Requirement

| | |
|--|--|
| COMS W1001 or COMS W1002 Computing in Context | INTRO TO INFORMATION SCIENCE |
| COMS W1004 | PROGRAMMING IN JAVA |
| COMS W3107 | Clean Object-Oriented Design |
| COMS W3134 | Data Structures in Java |
| STAT GU4001 | INTRODUCTION TO PROBABILITY AND STATISTICS |

Following are some suggested programs of instruction:

Information Science and Contemporary Society

Students may focus on how humans use technology and how technology has changed society.

The requirements include:

| | |
|-------------|--|
| COMS W4111 | INTRODUCTION TO DATABASES |
| COMS W4170 | USER INTERFACE DESIGN |
| COMS W4701 | ARTIFICIAL INTELLIGENCE |
| COMS W3410 | COMPUTERS AND SOCIETY |
| SOCI UN3010 | METHODS FOR SOCIAL RESEARCH |
| SOCI UN3960 | SEMINAR - PROBLEMS OF LAW # SOCIETY |

Information Science and the Economy

Students may focus on understanding information modeling together with existing and emerging needs in economics and finance as well as algorithms and systems to address those needs.

The requirements include:

| | |
|-------------|------------------------------|
| COMS W4111 | INTRODUCTION TO DATABASES |
| COMS W4701 | ARTIFICIAL INTELLIGENCE |
| COMS W4771 | |
| ECON UN3412 | INTRODUCTION TO ECONOMETRICS |
| ECON UN3025 | FINANCIAL ECONOMICS |
| ECON UN3265 | MONEY AND BANKING |

Information Science and Health Sciences

Students may focus on understanding information modeling together with existing and emerging needs in health sciences, as well as algorithms and systems to address those needs.

The requirements include:

| | |
|------------------|-----------------------------------|
| COMS W4111 | INTRODUCTION TO DATABASES |
| COMS W4170 | USER INTERFACE DESIGN |
| COMS W4701 | ARTIFICIAL INTELLIGENCE |
| BINF G4001 | |
| BIOL W4037 | Bioinformatics of Gene Expression |
| ECBM E3060/E4060 | |

Major in Data Science

In response to the ever-growing importance of "big data" in scientific and policy endeavors, the last few years have seen explosive growth in theory, methods, and applications at the interface between computer science and statistics. The statistics and computer science departments have responded with a joint major that emphasizes the interface between the disciplines.

Prerequisites (15 points)

| | |
|--------------------------------------|--------------------------------|
| MATH UN1101 | CALCULUS I |
| MATH UN1102 | CALCULUS II |
| MATH UN1201 | CALCULUS III |
| MATH UN2010 | LINEAR ALGEBRA |
| This introductory Statistics course: | |
| STAT UN1201 | CALC-BASED INTRO TO STATISTICS |
| Statistics (12 points) | |

| | |
|--------------------------------|------------------------------|
| STAT GU4203 | PROBABILITY THEORY |
| STAT GU4204 | STATISTICAL INFERENCE |
| STAT GU4205 | LINEAR REGRESSION MODELS |
| STAT GU4241 | STATISTICAL MACHINE LEARNING |
| or COMS W4771 Machine Learning | |

| | |
|-------------------------------------|--|
| Computer Science (12 points) | |
|-------------------------------------|--|

| | |
|--------------------------------------|------------------------------|
| Select one of the following courses: | |
| COMS W1004 | PROGRAMMING IN JAVA |
| COMS W1005 | INTRO-COMPUT SCI/PROG-MATLAB |
| COMS W1007 | |

| | |
|------------|-------------------------------|
| ENGI E1006 | INTRO TO COMP FOR ENG/APL SCI |
|------------|-------------------------------|

| | |
|--------------------------------------|--------------------------------|
| Select one of the following courses: | |
| COMS W3134 | Data Structures in Java |
| COMS W3136 | ESSENTIAL DATA STRUCTURES |
| COMS W3137 | HONORS DATA STRUCTURES # ALGOL |

| | |
|-----------------------|--------------------------|
| Two required courses: | |
| COMS W3203 | DISCRETE MATHEMATICS |
| CSOR W4231 | ANALYSIS OF ALGORITHMS I |

| | |
|------------------------------|--|
| Electives (15 points) | |
|------------------------------|--|

| | |
|--------------------------------------|--------------------------------|
| Select two of the following courses: | |
| STAT UN3106 | APPLIED MACHINE LEARNING |
| STAT GU4206 | STAT COMP # INTRO DATA SCIENCE |
| STAT GU4224 | BAYESIAN STATISTICS |
| STAT GU4243 | APPLIED DATA SCIENCE |
| STAT Q4242 | Advanced Machine Learning |

| | |
|--|--------------------------------|
| Select three of the following courses: | |
| COMS W3261 | COMPUTER SCIENCE THEORY |
| COMS W4111 | INTRODUCTION TO DATABASES |
| COMS W4236 | INTRO-COMPUTATIONAL COMPLEXITY |

| | |
|------------|--------------------------------|
| COMS W4252 | INTRO-COMPUTATIONAL LEARN THRY |
|------------|--------------------------------|

| | |
|------------------------------------|--|
| Any COMS W47xx course EXCEPT W4771 | |
|------------------------------------|--|

Minor in Computer Science

Students who pass the Computer Science Advanced Placement Exam A with a 4 or 5 will receive 3 points and an exemption from COMS W1004.

The Computer Science Minor consists of 6 courses as follows:

1. COMS W1004: Intro to computer science and programming in Java (3) or COMS W1007: Honors intro to comp sci (3)
2. COMS W3134: Data structures in Java (3) or COMS W3137: Honors data structures and algorithms (4)
3. COMS W3203: Discrete mathematics (4)
4. One course of the following:
 - COMS W3157: Advanced programming (4)
 - COMS W3261: Comp science theory (3)
 - CSEE W3827: Fundamentals of computer systems (3)
5. Any 3000-level or 4000-level COMS/CSXX/XXCS course of at least 3 points
6. Any 3000-level or 4000-level COMS/CSXX/XXCS course of at least 3 points OR one linear algebra or probability/statistics course from the following: APMA E3101, APMA E2101, MATH UN2010, MATH UN2015, IEOR E3658, STAT UN1201, STAT GU4001 or STAT GU4203.

Restrictions

Students pursuing a major or minor offered solely or jointly by the Computer Science department -- which currently include Computer Science major & minor, Information Science major, Data Science major, Computer Science and Mathematics major, and Computational Biology major -- are not eligible for the Artificial Intelligence minor.

No more than 6 points of project/thesis courses (COMS W3902, W3998, W4901) can count toward the major. COMS W3999 Fieldwork cannot be used as a CS Elective.

No more than one course from each set below may be applied towards the computer science major:

- IEOR E3658, STAT UN1201, MATH UN2015
- MATH UN2015, MATH UN2010, APAM E3101, COMS W3251
- COMS W4771, COMS W4721

| | |
|-------------|--|
| ELEN E4720 | Machine Learning for Signals, Information and Data |
| ELEN E4730 | Quantum Optimization and Machine Learning |
| IEOR E4212 | Data Analytics # Machine Learning for OR |
| IEOR E4540 | DATA MINING |
| MECE E4520 | DATA SCIENCE FOR MECHANICAL SYSTEMS |
| MECE E4602 | INTRODUCTION TO ROBOTICS |
| ORCS E4200 | Data-driven Decision Modeling |
| ORCS E4529 | Reinforcement Learning |
| POLS GU4728 | Machine Learning # AI for the Social Sciences |
| STAT GU4241 | STATISTICAL MACHINE LEARNING |
| STAT GU4242 | Advanced Machine Learning |
| STAT GU4243 | APPLIED DATA SCIENCE |
| STAT GU4244 | Unsupervised Learning |

MATH UN2015 may be substituted with a separate linear algebra course and a separate probability course, as with the CS Core.

Students pursuing a major or minor offered solely or jointly by the Computer Science department -- which currently include Computer Science major & minor, Information Science major, Data Science major, Computer Science and Mathematics major, and Computational Biology major -- are not eligible for the Artificial Intelligence minor.

Minor in Artificial Intelligence

The Minor in Artificial Intelligence consists of 6 courses as follows:

| | |
|-----------------------------|--|
| MATH UN2015 | Linear Algebra and Probability |
| ENGI E1006 or COMS W1002 | INTRO TO COMP FOR ENG/APP SCI COMPUTING IN CONTEXT |
| COMS W2132 or IEOR E2000 | Intermediate Computing in Python Data Engineering with Python |
| IEOR E2000 | Data Engineering with Python |

AI Requirement:

| | |
|------------|-------------------------|
| COMS W4701 | ARTIFICIAL INTELLIGENCE |
|------------|-------------------------|

Ethics Requirement:

| | |
|-------------|---------------------------------|
| Choose one: | |
| COMS W4710 | Ethical and Responsible AI |
| COMS W2702 | AI in Context |
| PSYC GU4836 | Machine Intelligence |
| ORCS E4201 | Policy for Privacy Technologies |
| COMS BC3420 | PRIVACY IN A NETWORKED WORLD |

AI Elective:

Choose One:

| | |
|--------------------------------------|---|
| Any COMS 47XX course | |
| Any "relevant" COMS 4995/6998 course | |
| BMEN E4460 | Deep Learning in Biomedical Imaging |
| BMEN E4470 | Deep Learning for Biomedical Signal Processing |
| BMEN E4480 | Statistical machine learning for genomics |
| CBMF W4761 | COMPUTATIONAL GENOMICS |
| CHEN E4180 | Machine Learning for Biomolecular and Cellular Applications |
| CIEN E4253 | COMP SOLID MECHANICS WITH AI |
| CIEN E4256 | Applied Machine Learning in Civil Engineering |
| EAEE E4000 | Machine learning for environmental engineering and science |
| ECBM E4040 | NEURAL NETWRKS # DEEP LEARNING |
| EECS E4764 | Artificial Intelligence of Things (AIoT) |

For students who entered Columbia in or before the 2023-24 academic year**Concentration in Computer Science**

The concentration in computer science requires a minimum of 22-24 points, as follows:

| | |
|-----------------------------|---|
| COMS W1004 or COMS W1007 | PROGRAMMING IN JAVA |
| COMS W3134 or COMS W3137 | Data Structures in Java HONORS DATA STRUCTURES # ALGOL |
| COMS W3157 | ADVANCED PROGRAMMING |
| COMS W3203 | DISCRETE MATHEMATICS |
| COMS W3261 | COMPUTER SCIENCE THEORY |
| CSEE W3827 | FUNDAMENTALS OF COMPUTER SYSTS (or any 3 point 4000-level computer science course) |

Select one of the following courses:

| | |
|-------------|--|
| COMS W3251 | COMPUTATIONAL LINEAR ALGEBRA |
| MATH UN2010 | LINEAR ALGEBRA |
| MATH UN2015 | Linear Algebra and Probability |
| MATH V2020 | Honors Linear Algebra |
| APMA E2101 | INTRO TO APPLIED MATHEMATICS |
| APMA E3101 | APPLIED MATH I: LINEAR ALGEBRA |
| IEOR E3658 | PROBABILITY FOR ENGINEERS |
| STAT UN1201 | CALC-BASED INTRO TO STATISTICS |
| STAT GU4001 | INTRODUCTION TO PROBABILITY AND STATISTICS |

Computer Science

COMS E0001 FOUND OF COMPUT SCI-TRACK. 0.00 points.

COMS E0002 SOFTWARE SYSTEMS TRACK. 0.00 points.

COMS E0003 INTELLIGENT SYSTEMS TRACK. 0.00 points.

COMS E0004 APPLICATIONS-TRACK. 0.00 points.

COMS E0005 VISION # GRAPHICS-TRACK. 0.00 points.

COMS E0006 DIGITAL SYSTEMS TRACK. 0.00 points.

COMS W1001 INTRO TO INFORMATION SCIENCE. 3.00 points.

Lect: 3.

Basic introduction to concepts and skills in Information Sciences: human-computer interfaces, representing information digitally, organizing and searching information on the internet, principles of algorithmic problem solving, introduction to database concepts, and introduction to programming in Python

Fall 2025: COMS W1001

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|-------------|--------|------------|
| COMS 1001 | 001/12789 | T Th 10:10am - 11:25am 303 Urs Hall | Adam Cannon | 3.00 | 51/60 |

COMS W1002 COMPUTING IN CONTEXT. 4.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Introduction to elementary computing concepts and Python programming with domain-specific applications. Shared CS concepts and Python programming lectures with track-specific sections. Track themes will vary but may include computing for the social sciences, computing for economics and finance, digital humanities, and more. Intended for nonmajors. Students may only receive credit for one of ENGI E1006 or COMS W1002

Fall 2025: COMS W1002

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|--|--------|------------|
| COMS 1002 | 001/12790 | T Th 1:10pm - 2:25pm 417 International Affairs Bldg | Adam Cannon, Mark Santolucito | 4.00 | 104/300 |

COMS W1003 INTRO-COMPUT SCI/PROGRAM IN C. 3.00 points.

COMS W1004 PROGRAMMING IN JAVA. 3.00 points.

Lect: 3.

A general introduction to computer science for science and engineering students interested in majoring in computer science or engineering. Covers fundamental concepts of computer science, algorithmic problem-solving capabilities, and introductory Java programming skills. Assumes no prior programming background. Columbia University students may receive credit for only one of the following two courses: 1004 or 1005.

Fall 2025: COMS W1004

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|------------|--------|------------|

COMS W2132 Intermediate Computing in Python. 4.00 points.

Prerequisites: (ENGI E1006) or (COMS W1002) or equivalent prior programming background in Python.

Essential data structures and algorithms in Python with practical software development skills, applications in a variety of areas including biology, natural language processing, data science and others.

Spring 2026: COMS W2132

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|--------------|--------|------------|
| COMS 2132 | 001/12342 | M W 10:10am - 11:25am 451 Computer Science Bldg | Daniel Bauer | 4.00 | 84/80 |

COMS W2702 AI in Context. 3.00 points.

Prerequisites: STAT UN1201 or equivalent is strongly recommended. An interdisciplinary introduction to the history, development and modern application of artificial intelligence in a variety of contexts. Context subjects and teaching staff will vary by semester.

Fall 2025: COMS W2702

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|--|--------|------------|
| COMS 2702 | 001/12816 | T Th 11:40am - 12:55pm 301 Uris Hall | Chris Wiggins, Vishal Misra, Katja Vogt, Adam Cannon, Kirkwood Adams, Seth Cluett, Maria Baker | 3.00 | 98/220 |

COMS W3011 INTERMED COMPUTER PROGRAMMING. 3.00 points.**COMS W3101 PROGRAMMING LANGUAGES. 1.00 point.**

Lect: 1.

Prerequisites: Fluency in at least one programming language. Introduction to a programming language. Each section is devoted to a specific language. Intended only for those who are already fluent in at least one programming language. Sections may meet for one hour per week for the whole term, for three hours per week for the first third of the term, or for two hours per week for the first six weeks. May be repeated for credit if different languages are involved

COMS W3102 DEVELOPMENT TECHNOLOGY. 1.00-2.00 points.

Lect: 2. Lab: 0-2.

Prerequisites: Fluency in at least one programming language. Introduction to software development tools and environments. Each section devoted to a specific tool or environment. One-point sections meet for two hours each week for half a semester, and two point sections include an additional two-hour lab

COMS W3107 Clean Object-Oriented Design. 3.00 points.

Prerequisites: COMS W1004 or permission of instructor. May not take for credit if already received credit for COMS W1007

A course in designing, documenting, coding, and testing robust computer software, according to object-oriented design patterns and clean coding practices. Taught in Java. Object-oriented design principles include: use cases; CRC; UML; javadoc; patterns (adapter, builder, command, composite, decorator, facade, factory, iterator, lazy evaluation, observer, singleton, strategy, template, visitor); design by contract; loop invariants; interfaces and inheritance hierarchies; anonymous classes and null objects; graphical widgets; events and listeners; Java's Object class; generic types; reflection; timers, threads, and locks.

Fall 2025: COMS W3107

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|------------------|--------|------------|
| COMS 3107 | 001/12817 | T Th 2:40pm - 3:55pm 602 Hamilton Hall | Christian Murphy | 3.00 | 75/80 |

COMS W3123 ASSEMBLY LANG AND COMPUT LOGIC. 3.00 points.**COMS W3132 Intermediate Computing in Python. 4.00 points.**

Prerequisites: ENGI E1006 OR COMS W1002; or equivalent Python programming experience. Intermediate interdisciplinary course in computing intended for non-CS majors.

Essential data structures and algorithms in Python with practical software development skills, applications in a variety of areas including biology, natural language processing, data science and others

COMS W3134 Data Structures in Java. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W1004) or COMS W1004; Knowledge of Java Data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs. Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Rudiments of the analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following three courses: COMS W3134, COMS W3136, COMS W3137.

Fall 2025: COMS W3134

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|----------------|--------|------------|
| COMS 3134 | 001/12818 | M W 4:10pm - 5:25pm 501 Northwest Corner | Brian Borowski | 3 | 153/164 |
| COMS 3134 | 002/12819 | M W 5:40pm - 6:55pm 501 Northwest Corner | Brian Borowski | 3 | 140/164 |

Spring 2026: COMS W3134

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|------------|--------|------------|
| COMS 3134 | 001/12344 | M W 2:40pm - 3:55pm 417 International Affairs Bldg | Paul Blaer | 3 | 234/320 |
| COMS 3134 | 002/12345 | M W 5:40pm - 6:55pm 501 Northwest Corner | Paul Blaer | 3 | 157/164 |

COMS W3136 ESSENTIAL DATA STRUCTURES. 4.00 points.

Prerequisites: (COMS W1004) or (COMS W1005) or (COMS W1007) or (ENGI E1006) COMS W1005 OR COMS W1007 OR ENGI E1006 OR COMS W1004

A second programming course intended for nonmajors with at least one semester of introductory programming experience. Basic elements of programming in C and C , arraybased data structures, heaps, linked lists, C programming in UNIX environment, object-oriented programming in C , trees, graphs, generic programming, hash tables. Due to significant overlap, students may only receive credit for either COMS W3134, W3136, or W3137

Spring 2026: COMS W3136

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|------------------------------------|----------------|--------|------------|
| COMS 3136 | 001/19602 | T 4:10pm - 6:30pm 330 Uris Hall | Brian Borowski | 4.00 | 18/30 |

COMS W3137 HONORS DATA STRUCTURES # ALGOL. 4.00 points.

Prerequisites: (COMS W1004) or (COMS W1007) COMS W1004 OR COMS W1007

Corequisites: COMS W3203

An honors introduction to data types and structures: arrays, stacks, singly and doubly linked lists, queues, trees, sets, and graphs.

Programming techniques for processing such structures: sorting and searching, hashing, garbage collection. Storage management. Design and analysis of algorithms. Taught in Java. Note: Due to significant overlap, students may receive credit for only one of the following three courses: COMS W3134, W3136, or W3137

COMS W3157 ADVANCED PROGRAMMING. 4.00 points.

Lect: 4.

Prerequisites: (COMS W3134) or (COMS W3137) COMS W3134 OR COMS W3137

C programming language and Unix systems programming. Also covers Git, Make, TCP/IP networking basics, C fundamentals

Fall 2025: COMS W3157

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|------------|--------|------------|
| COMS 3157 | 001/12821 | T Th 4:10pm - 5:25pm 417 International Affairs Bldg | Jae Lee | 4.00 | 248/398 |
| COMS 3157 | 002/12822 | F 12:10pm - 2:00pm 330 Uris Hall | Jae Lee | 4.00 | 39/60 |

Spring 2026: COMS W3157

| COMS 3157 | 002/12347 | M W 5:40pm - 6:55pm 501 Schermerhorn Hall | Brian Borowski | 4.00 | 113/164 |

COMS W3202 FINITE MATHEMATICS. 3.00 points.**COMS W3203 DISCRETE MATHEMATICS. 4.00 points.**

Lect: 3.

Prerequisites: Any introductory course in computer programming. Logic and formal proofs, sequences and summation, mathematical induction, binomial coefficients, elements of finite probability, recurrence relations, equivalence relations and partial orderings, and topics in graph theory (including isomorphism, traversability, planarity, and colorings)

Fall 2025: COMS W3203

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |

COMS W3204 FINITE MATHEMATICS. 3.00 points.**COMS W3205 INTRO TO DISCRETE STRUCTURES. 3.00 points.****COMS W3210 SCIENTIFIC COMPUTATION. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: two terms of calculus.

Introduction to computation on digital computers. Design and analysis of numerical algorithms. Numerical solution of equations, integration, recurrences, chaos, differential equations. Introduction to Monte Carlo methods. Properties of floating point arithmetic. Applications to weather prediction, computational finance, computational science, and computational engineering.

COMS W3240 ELEMENTARY NUMERICAL ANALYSIS. 3.00 points.**COMS W3244 PROBABILITY AND MATRIX MODELS. 3.00 points.****COMS W3251 COMPUTATIONAL LINEAR ALGEBRA. 4.00 points.****COMS W3252 SCIENTIFIC COMPUTATION II. 3.00 points.****COMS W3261 COMPUTER SCIENCE THEORY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3203)

Corequisites: COMS W3134, COMS W3136, COMS W3137

Regular languages: deterministic and non-deterministic finite automata, regular expressions. Context-free languages: context-free grammars, push-down automata. Turing machines, the Chomsky hierarchy, and the Church-Turing thesis. Introduction to Complexity Theory and NP-Completeness.

Fall 2025: COMS W3261

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |

COMS W3410 COMPUTERS AND SOCIETY. 3.00 points.

Lect: 3.

Broader impact of computers. Social networks and privacy. Employment, intellectual property, and the media. Science and engineering ethics.

Suitable for nonmajors

Fall 2025: COMS W3410

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---------------------------------------|----------------|--------|------------|
| COMS 3410 | 001/12828 | W 4:10pm - 6:40pm 313 Fayerweather | Ronald Baecker | 3.00 | 81/78 |

COMS W3770 Mathematics for Machine Learning. 3.00 points.

Prerequisites: (MATH UN2010 or MATH UN2015 or APMA E2101 or APMA E3101 or COMS W3251) and (MATH UN1201 or MATH UN1205 or APMA E2000) and (STAT UN1201 or MATH UN2015 or IEOR E3658)

Familiarity with mathematical proof writing

Mathematical foundations of machine learning: Linear algebra, multivariable calculus, and probability and statistics. Comprehensive review and additional treatment of relevant topics used in the analysis and design of machine learning models. Preliminary exposure to core algorithms such as linear regression, gradient descent, principal component analysis, low-rank approximations, and kernel methods.

COMS E3899 Research Training. 0.00 points.

Research training course. Recommended in preparation for laboratory related research

COMS W3902 UNDERGRADUATE THESIS. 0.00-6.00 points.

Prerequisites: Agreement by a faculty member to serve as thesis adviser. An independent theoretical or experimental investigation by an undergraduate major of an appropriate problem in computer science carried out under the supervision of a faculty member. A formal written report is mandatory and an oral presentation may also be required. May be taken over more than one term, in which case the grade is deferred until all 6 points have been completed. Consult the department for section assignment

COMS W3995 TOPICS IN COMPUTER SCIENCE. 3.00 points.

Lect: 3.

Consult the department for section assignment. Special topics arranged as the need and availability arise. Topics are usually offered on a one-time basis. Since the content of this course changes each time it is offered, it may be repeated for credit.

COMS W3998 UNDERGRAD PROJECTS IN COMPUTER SCIENCE.**1.00-3.00 points.**

Prerequisites: Approval by a faculty member who agrees to supervise the work.

Independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit. Consult the department for section assignment

COMS W3999 FIELDWORK. 1.00-2.00 points.

Prerequisites: Obtained internship and approval from faculty advisor. May be repeated for credit, but no more than 3 total points may be used toward the 128-credit degree requirement. Only for SEAS computer science undergraduate students who include relevant off campus work experience as part of their approved program of study. Final report and letter of evaluation may be required. May not be used as a technical or nontechnical elective or as a GTE (general technical elective). May not be taken for pass/fail credit or audited.

COMS E3999 Fieldwork. 1 point.

May be repeated for credit, but no more than 3 total points may be used toward the 128-credit degree requirement. Only for SEAS computer science undergraduate students who include relevant off-campus work experience as part of their approved program of study. Final report and letter of evaluation required. May not be used as a technical or non-technical elective. May not be taken for pass/fail credit or audited.

COMS E4111 INTRODUCTION TO DATABASES. 3.00 points.**COMS W4111 INTRODUCTION TO DATABASES. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134) and (COMS W3136) and (COMS W3137) COMS W3134, COMS W3136, or COMS W3136; or instructor's permission The fundamentals of database design and application development using databases: entity-relationship modeling, logical design of relational databases, relational data definition and manipulation languages, SQL, XML, query processing, physical database tuning, transaction processing, security. Programming projects are required.

Fall 2025: COMS W4111

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|--------------------------------|---------------------|---|-----------------|--------|------------|
| COMS 4111 | 001/12829 | M W 4:10pm - 5:25pm 417 International Affairs Bldg | Kenneth Ross | 3.00 | 257/320 |

COMS W4112 DATABASE SYSTEM IMPLEMENTATION. 3.00 points.

Lect: 2.5.

Prerequisites: (COMS W4111) and COMS W4111; fluency in Java or C++. CSEE W3827 is recommended.

The principles and practice of building large-scale database management systems. Storage methods and indexing, query processing and optimization, materialized views, transaction processing and recovery, object-relational databases, parallel and distributed databases, performance considerations. Programming projects are required

COMS W4113 FUND-LARGE-SCALE DIST SYSTEMS. 3.00 points.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3157 or COMS W4118 or CSEE W4119) COMS W3134, W3136, or W3137. COMS W3157 or good working knowledge of C and C++. COMS W4118 or CSEE W4119.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3157 or COMS W4118 or CSEE W4119) Design and implementation of large-scale distributed and cloud systems. Teaches abstractions, design and implementation techniques that enable the building of fast, scalable, fault-tolerant distributed systems. Topics include distributed communication models (e.g. sockets, remote procedure calls, distributed shared memory), distributed synchronization (clock synchronization, logical clocks, distributed mutex), distributed file systems, replication, consistency models, fault tolerance, distributed transactions, agreement and commitment, Paxos-based consensus, MapReduce infrastructures, scalable distributed databases. Combines concepts and algorithms with descriptions of real-world implementations at Google, Facebook, Yahoo, Microsoft, LinkedIn, etc

Fall 2025: COMS W4113

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |

| COMS 4113 | 001/12831 | F 10:10am - 12:40pm 451 Computer Science Bldg | Roxana Geambasu | 3.00 | 105/110 |
| COMS 4113 | V01/17905 | | Roxana Geambasu | 3.00 | 13/99 |

COMS W4114 ASSEMBLY LANG AND SYSTEMS PROG. 3.00 points.**COMS E4115 PROGRAMMING LANG # TRANSL. 3.00 points.****COMS W4115 PROGRAMMING LANG # TRANSLATORS. 3.00 points.**

Lect: 3.

Prerequisites: (COMS W3134) or (COMS W3136) or (COMS W3137) or (COMS W3261 and CSEE W3827) Or the instructor's permission Modern programming languages and compiler design. Imperative, object-oriented, declarative, functional, and scripting languages. Language syntax, control structures, data types, procedures and parameters, binding, scope, run-time organization, and exception handling.

Implementation of language translation tools including compilers and interpreters. Lexical, syntactic and semantic analysis; code generation; introduction to code optimization. Teams implement a language and its compiler.

Fall 2025: COMS W4115

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|-----------------|--------|------------|
| COMS 4115 | 001/12832 | M 1:10pm - 3:40pm 417 International Affairs Bldg | Hubertus Franke | 3.00 | 47/110 |
| COMS 4115 | V01/17906 | | Hubertus Franke | 3.00 | 2/99 |

COMS W4118 OPERATING SYSTEMS I. 3.00 points.

Lect: 3.

Prerequisites: (CSEE W3827) and CSEE W3827; Knowledge of C and programming tools as covered in COMS COMS W3136, COMS W3157, or COMS W3101, or the instructor's permission.

Design and implementation of operating systems. Topics include process management, process synchronization and interprocess communication, memory management, virtual memory, interrupt handling, processor scheduling, device management, I/O, and file systems. Case study of the UNIX operating system. A programming project is required

Fall 2025: COMS W4118

| COMS 4118 | V01/16647 | | Hubertus Franke | 3.00 | 11/99 |

COMS W4119 COMPUTER NETWORKS. 3.00 points.

Prerequisites: Comfort with basic probability and programming fluency in Python, C++, Java, or Ruby.

Introduction to computer networks and the technical foundations of the internet, including applications, protocols, local area networks, algorithms for routing and congestion control, security, elementary performance evaluation. Several written and programming assignments required

COMS W4121 COMPUTER SYSTEMS FOR DATA SCIENCE. 3.00 points.

Prerequisites: CSOR W4246 OR STAT W4203; or equivalent as approved by faculty advisor. background in Computer System Organization and good working knowledge of C/C++

Corequisites: CSOR W4246,STAT GU4203

An introduction to computer architecture and distributed systems with an emphasis on warehouse scale computing systems. Topics will include fundamental tradeoffs in computer systems, hardware and software techniques for exploiting instruction-level parallelism, data-level parallelism and task level parallelism, scheduling, caching, prefetching, network and memory architecture, latency and throughput optimizations, specialization, and an introduction to programming data center computers

COMS W4125 PROGRAMMING LANGUAGE SEMANTICS. 3.00 points.**COMS W4137 From Algorithmic Thinking to Development. 3.00 points.**

Algorithmic problem-solving and coding skills needed to devise solutions to interview questions for software engineering positions. Solutions are implemented in Python, Java, C, and C . Approaches include brute-force, hashing, sorting, transform-and-conquer, greedy, and dynamic programming. Focus on experimentation and team work

COMS W4152 Engineering Software-as-a-Service. 3.00 points.

Prerequisites: COMS W3134 AND COMS W3157 AND CSEE W3827
Modern software engineering concepts and practices including topics such as Software-as-a-Service, Service-oriented Architecture, Agile Development, Behavior-driven Development, Ruby on Rails, and Dev/ops

Fall 2025: COMS W4152

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|--------------|--------|------------|
| COMS 4152 | 001/12834 | T Th 8:40am - 9:55am 833 Seeley W. Mudd Building | Junfeng Yang | 3.00 | 115/120 |

COMS W4153 Cloud Computing. 3.00 points.

Prerequisites: COMS W4111

Software engineering skills necessary for developing cloud computing and software-as-a-service applications, covering topics such as service-oriented architectures, message-driven applications, and platform integration. Includes theoretical study, practical application, and collaborative project work

Fall 2025: COMS W4153

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|-----------------|--------|------------|
| COMS 4153 | 001/12835 | F 1:10pm - 3:40pm 501 Northwest Corner | Donald Ferguson | 3.00 | 156/155 |

COMS W4156 ADVANCED SOFTWARE ENGINEERING. 3.00 points.

Lect: 3.

Software lifecycle using frameworks, libraries and services. Major emphasis on software testing. Centers on a team project.

Fall 2025: COMS W4156

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|-------------|--------|------------|
| COMS 4156 | 001/12836 | T Th 10:10am - 11:25am 207 Mathematics Building | Gail Kaiser | 3.00 | 104/110 |
| COMS 4156 | V01/17908 | | Gail Kaiser | 3.00 | 17/99 |

COMS W4160 COMPUTER GRAPHICS. 3.00 points.

Lect: 3.

Prerequisites: (COMS W3134) or (COMS W3136) or (COMS W3137)
COMS W3134 OR COMS W3136 OR COMS W3137; Strong programming background and some mathematical familiarity including linear algebra is required.

Introduction to computer graphics. Topics include 3D viewing and projections, geometric modeling using spline curves, graphics systems such as OpenGL, lighting and shading, and global illumination. Significant implementation is required: the final project involves writing an interactive 3D video game in OpenGL. Due to significant overlap in content, only one of COMS 4160 or Barnard COMS 3160BC may be taken for credit

Fall 2025: COMS W4160

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|---------------|--------|------------|
| COMS 4160 | 001/12837 | M W 10:10am - 11:25am 451 Computer Science Bldg | Silvia Sellan | 3.00 | 66/70 |

COMS W4162 ADVANCED COMPUTER GRAPHICS. 3.00 points.

Lect: 3.

Prerequisites: (COMS W4160) or COMS W4160

A second course in computer graphics covering more advanced topics including image and signal processing, geometric modeling with meshes, advanced image synthesis including ray tracing and global illumination, and other topics as time permits. Emphasis will be placed both on implementation of systems and important mathematical and geometric concepts such as Fourier analysis, mesh algorithms and subdivision, and Monte Carlo sampling for rendering. Note: Course will be taught every two years.

COMS W4165 COMPUT TECHNIQUES-PIXEL PROCSS. 3.00 points.

Prerequisites: COMS W3137, COMS W3251 recommended, and a good working knowledge of UNIX and C. Intended for graduate students and advanced undergraduates.

An intensive introduction to image processing - digital filtering theory, image enhancement, image reconstruction, antialiasing, warping, and the state of the art in special effects. Topics from the basis of high-quality rendering in computer graphics and of low-level processing for computer vision, remote sensing, and medical imaging. Emphasizes computational techniques for implementing useful image-processing functions

COMS W4167 COMPUTER ANIMATION. 3.00 points.

Lect: 3.

Theory and practice of physics-based animation algorithms, including animated clothing, hair, smoke, water, collisions, impact, and kitchen sinks. Topics covered: Integration of ordinary differential equations, formulation of physical models, treatment of discontinuities including collisions/contact, animation control, constrained Lagrangian Mechanics, friction/dissipation, continuum mechanics, finite elements, rigid bodies, thin shells, discretization of Navier-Stokes equations. General education requirement: quantitative and deductive reasoning (QUA).

Spring 2026: COMS W4167

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|---------------|--------|------------|
| COMS 4167 | 001/16837 | T Th 4:10pm - 5:25pm 214 Pupin Laboratories | Changxi Zheng | 3.00 | 52/50 |

COMS W4231 ANALYSIS OF ALGORITHMS I. 3.00 points.**COMS W4232 Advanced Algorithms. 3.00 points.**

Prerequisite: Analysis of Algorithms (COMS W4231).

Prerequisites: see notes re: points COMS W4231

Introduces classic and modern algorithmic ideas that are central to many areas of Computer Science. The focus is on most powerful paradigms and techniques of how to design algorithms, and how to measure their efficiency. The intent is to be broad, covering a diversity of algorithmic techniques, rather than be deep. The covered topics have all been implemented and are widely used in industry. Topics include: hashing, sketching/streaming, nearest neighbor search, graph algorithms, spectral graph theory, linear programming, models for large-scale computation, and other related topics

Spring 2026: COMS W4232

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|-----------------|--------|------------|
| COMS 4232 | 001/12355 | M W 2:40pm - 3:55pm 1127 Seeley W. Mudd Building | Alexandr Andoni | 3.00 | 47/60 |
| COMS 4232 | V01/16649 | | Alexandr Andoni | 3.00 | 7/99 |

COMS W4236 INTRO-COMPUTATIONAL COMPLEXITY. 3.00 points.

Lect: 3.

Prerequisites: (COMS W3261) COMS W3261

Develops a quantitative theory of the computational difficulty of problems in terms of the resources (e.g. time, space) needed to solve them. Classification of problems into complexity classes, reductions, and completeness. Power and limitations of different modes of computation such as nondeterminism, randomization, interaction, and parallelism

Fall 2025: COMS W4236

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|------------|--------|------------|
| COMS 4236 | 002/12840 | M W 10:10am - 11:25am 627 Seeley W. Mudd Building | Xi Chen | 3.00 | 21/50 |
| COMS 4236 | V02/17911 | | Xi Chen | 3.00 | 3/99 |

COMS W4241 NUMERICL ALGORITHMS-COMPLEXITY. 3.00 points.

Lect: 3.

Prerequisites: knowledge of a programming language. Some knowledge of scientific computation is desirable.

Modern theory and practice of computation on digital computers. Introduction to concepts of computational complexity. Design and analysis of numerical algorithms. Applications to computational finance, computational science, and computational engineering.

COMS W4242 NUMRCL ALGORTHMS-COMPLEXITY II. 3.00 points.**COMS W4252 INTRO-COMPUTATIONAL LEARN THRY. 3.00 points.**

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (CSOR W4231) or (COMS W4236) or (COMS W3203) or (COMS W3261)

Possibilities and limitations of performing learning by computational agents. Topics include computational models of learning, polynomial time learnability, learning from examples and learning from queries to oracles. Computational and statistical limitations of learning. Applications to Boolean functions, geometric functions, automata.

Fall 2025: COMS W4252

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|----------------|--------|------------|
| COMS 4252 | 001/12841 | T Th 11:40am - 12:55pm 702 Hamilton Hall | Rocco Servedio | 3.00 | 62/86 |
| COMS 4252 | V01/17912 | | Rocco Servedio | 3.00 | 10/99 |

COMS W4261 INTRO TO CRYPTOGRAPHY. 3.00 points.

Lect: 2.5.

Prerequisites: COMS W3261 OR CSOR W4231; Comfort with basic discrete math and probability. Recommended: COMS W3261 or CSOR W4231.

An introduction to modern cryptography, focusing on the complexity-theoretic foundations of secure computation and communication in adversarial environments; a rigorous approach, based on precise definitions and provably secure protocols. Topics include private and public key encryption schemes, digital signatures, authentication, pseudorandom generators and functions, one-way functions, trapdoor functions, number theory and computational hardness, identification and zero knowledge protocols

Fall 2025: COMS W4261

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---------------------------------------|------------|--------|------------|
| COMS 4261 | 001/12842 | T Th 2:40pm - 3:55pm 142 Uris Hall | Tal Malkin | 3.00 | 32/105 |

COMS W4281 INTRO TO QUANTUM COMPUTING. 3.00 points.

Lect: 3.

Introduction to quantum computing. Shor's factoring algorithm, Grover's database search algorithm, the quantum summation algorithm. Relationship between classical and quantum computing. Potential power of quantum computers.

Fall 2025: COMS W4281

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|------------|--------|------------|
| COMS 4281 | 001/12843 | T Th 10:10am - 11:25am 209 Havemeyer Hall | Henry Yuen | 3.00 | 77/100 |

Spring 2026: COMS W4281

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|----------------|--------|------------|
| COMS 4281 | 001/12356 | T Th 2:40pm - 3:55pm 451 Computer Science Bldg | James Bartusek | 3.00 | 98/100 |

COMS W4295 Topics in Theoretical Computer Science. 3.00 points.

Selected topics in theoretical computer science. Content and prerequisites vary between sections and semesters. May be repeated for credit. Check "topics courses" webpage on the department website for more information on each section

COMS W4419 Internet Technology, Economics, and Policy. 3.00 points.

Prerequisites: General engineering, economics, law or technology background. Programming background is not required. Technology, economic and policy aspects of the Internet. Summarizes how the Internet works technically, including protocols, standards, radio spectrum, global infrastructure and interconnection. Micro-economics with a focus on media and telecommunication economic concerns, including competition and monopolies, platforms, and behavioral economics. US constitution, freedom of speech, administrative procedures act and regulatory process, universal service, role of FCC. Not a substitute for CSEE4119. Suitable for non-majors

Spring 2026: COMS W4419

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|---------------------|--------|------------|
| COMS 4419 | 001/12357 | M W 4:10pm - 5:25pm 825 Seeley W. Mudd Building | Henning Schulzrinne | 3.00 | 49/44 |

COMS W4444 PROGRAMMING # PROBLEM SOLVING. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 and COMS W3136) or (COMS W3137 and CSEE W3827)

Hands-on introduction to solving open-ended computational problems. Emphasis on creativity, cooperation, and collaboration. Projects spanning a variety of areas within computer science, typically requiring the development of computer programs. Generalization of solutions to broader problems, and specialization of complex problems to make them manageable. Team-oriented projects, student presentations, and in-class participation required.

Fall 2025: COMS W4444

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|--------------|--------|------------|
| COMS 4444 | 001/12844 | M W 1:10pm - 2:25pm 337 Seeley W. Mudd Building | Kenneth Ross | 3.00 | 31/34 |

COMS W4460 PRIN-INNOVATN/ENTREPRENEURSHIP. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) Or instructor's permission

Team project centered course focused on principles of planning, creating, and growing a technology venture. Topics include: identifying and analyzing opportunities created by technology paradigm shifts, designing innovative products, protecting intellectual property, engineering innovative business models.

Fall 2025: COMS W4460

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|------------------|--------|------------|
| COMS 4460 | 001/12845 | M W 8:40am - 9:55am 627 Seeley W. Mudd Building | William Reinisch | 3.00 | 39/40 |

COMS W4701 ARTIFICIAL INTELLIGENCE. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and COMS W3134 OR COMS W3136 OR COMS W3137; Any course on probability

Prior knowledge of Python is recommended. Provides a broad understanding of the basic techniques for building intelligent computer systems. Topics include state-space problem representations, problem reduction and and-or graphs, game playing and heuristic search, predicate calculus, and resolution theorem proving, AI systems and languages for knowledge representation, machine learning and concept formation and other topics such as natural language processing may be included as time permits

Fall 2025: COMS W4701

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|-------------------------------|--------|------------|
| COMS 4701 | 001/12846 | T Th 10:10am - 11:25am 501 Northwest Corner | Ansaf Salleb-Aouissi | 3.00 | 136/150 |

COMS W4705 NATURAL LANGUAGE PROCESSING. 3.00 points.

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or Python programming experience, probability theory, and linear algebra recommended. Some previous or concurrent exposure to AI and machine learning is beneficial. Some previous or concurrent exposure to AI or Machine Learning is recommended but not required.

Computational approaches to the analysis, understanding, and generation of natural language text at scale. Emphasis on machine learning techniques for NLP, including deep learning and large language models. Applications may include information extraction, sentiment analysis, question answering, summarization, machine translation, and conversational AI. Discussion of datasets, benchmarking and evaluation, interpretability, and ethical considerations. Due to significant overlap in content, only one of COMS 4705 or Barnard COMS 3705BC may be taken for credit.

Fall 2025: COMS W4705

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |

| COMS 4705 | 030/11555 | M 7:00pm - 9:30pm 209 Havemeyer Hall | Andrei Simion | 3.00 | 90/90 |
| COMS 4705 | V02/20123 | | Daniel Bauer | 3.00 | 9/99 |

COMS W4706 Spoken Language Processing. 3 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) or COMS W3134, W3136, or W3137; or the instructor's permission.

Computational approaches to speech generation and understanding. Topics include speech recognition and understanding, speech analysis for computational linguistics research, and speech synthesis. Speech applications including dialogue systems, data mining, summarization, and translation. Exercises involve data analysis and building a small text-to-speech system.

COMS W4710 Ethical and Responsible AI. 3.00 points.

Prerequisites: (COMS W2132) or (COMS W3134) or (COMS W3136) or (COMS W3137) or (IEOR E2000) Programming proficiency in Python. Basic knowledge of probability theory and statistics. Familiarity with machine learning recommended.

Principles of Ethical Artificial Intelligence across technical and societal dimensions. Combines technical AI and machine learning implementations and ethical analysis. Students will learn to build, audit, and mitigate ethical risks in AI systems using tools like fairness libraries, explainability frameworks, and privacy-preserving techniques. Emphasizes coding, algorithmic critique, and real-world cases. Topics include: foundations of AI ethics, fairness, interpretability, explainability, accountability, privacy, robustness, alignment, safety, and societal benefit. Assessments include coding projects, bias auditing assignments, and ethical analysis papers.

Spring 2026: COMS W4710

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |

COMS W4725 Knowledge representation and reasoning. 3 points.

Lect: 3. Not offered during 2024-2025 academic year.

Prerequisites: (COMS W4701)

General aspects of knowledge representation (KR). The two fundamental paradigms (semantic networks and frames) and illustrative systems. Topics include hybrid systems, time, action/plans, defaults, abduction, and case-based reasoning. Throughout the course particular attention is paid to design trade-offs between language expressiveness and reasoning complexity, and issues relating to the use of KR systems in larger applications.

COMS W4731 Computer Vision I: First Principles. 3.00 points.

Lect: 3.

Prerequisites: Fundamentals of calculus, linear algebra, and C programming. Students without any of these prerequisites are advised to contact the instructor prior to taking the course.

Introductory course in computer vision. Topics include image formation and optics, image sensing, binary images, image processing and filtering, edge extraction and boundary detection, region growing and segmentation, pattern classification methods, brightness and reflectance, shape from shading and photometric stereo, texture, binocular stereo, optical flow and motion, 2D and 3D object representation, object recognition, vision systems and applications

Fall 2025: COMS W4731

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|---------------|--------|------------|
| COMS 4731 | 001/12850 | M W 5:40pm - 6:55pm 451 Computer Science Bldg | Austin Reiter | 3.00 | 82/100 |

COMS W4732 Computer Vision II: Learning. 3.00 points.

Prerequisites: COMS W4731; Fundamentals of calculus, linear algebra, and Python programming. Students without any of these prerequisites are advised to contact the instructor prior to taking the course.

Advanced course in computer vision. Topics include convolutional networks and back-propagation, object and action recognition, self-supervised and few-shot learning, image synthesis and generative models, object tracking, vision and language, vision and audio, 3D representations, interpretability, and bias, ethics, and media deception

Spring 2026: COMS W4732

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |

COMS W4733 COMPUTATIONAL ASPECTS OF ROBOTICS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) and (COMS W3251 or MATH UN2010 or APMA E2101 or APMA E3101 or MATH UN2015) and (STAT GU4001 or IEOR E3658 or STAT UN1201 or MATH UN2015) Proficiency in Python or a similar programming language. Introduction to fundamental problems and algorithms in robotics. Topics include configuration spaces, motion and sensor models, search and sampling-based planning, state estimation, localization and mapping, perception, and learning.

Fall 2025: COMS W4733

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|------------|--------|------------|
| COMS 4733 | 001/12851 | M W 2:40pm - 3:55pm 451 Computer Science Bldg | Yunzhu Li | 3.00 | 88/100 |
| COMS 4733 | V01/17915 | | Yunzhu Li | 3.00 | 10/99 |

COMS W4735 VISUAL INTERFACES TO COMPUTERS. 3.00 points.

Lect: 3.

Prerequisites: (COMS W3134 or COMS W3136 or COMS W3137) COMS W3134 OR COMS W3136 OR COMS W3137

Visual input as data and for control of computer systems. Survey and analysis of architecture, algorithms, and underlying assumptions of commercial and research systems that recognize and interpret human gestures, analyze imagery such as fingerprint or iris patterns, generate natural language descriptions of medical or map imagery. Explores foundations in human psychophysics, cognitive science, and artificial intelligence

COMS W4737 BIOMETRICS. 3.00 points.

CC/GS: Partial Fulfillment of Science Requirement

Prerequisites: a background at the sophomore level in computer science, engineering, or like discipline.

In this course, we will explore the latest advances in biometrics as well as the machine learning techniques behind them. Students will learn how these technologies work and how they are sometimes defeated. Grading will be based on homework assignments and a final project. There will be no midterm or final exam. This course shares lectures with *COMS E6737*. Students taking *COMS E6737* are required to complete additional homework problems and undertake a more rigorous final project. Students will only be allowed to earn credit for *COMS W4737* or *COMS E6737* and not both.

COMS W4762 Machine Learning for Functional Genomics. 3 points.

Prerequisites: Proficiency in a high level programming language Python/R/Julia. An introductory machine learning class such as COMS W4771 Machine Learning will be helpful but is not required.

This course will introduce modern probabilistic machine learning methods using applications in data analysis tasks from functional genomics, where massively-parallel sequencing is used to measure the state of cells: e.g. what genes are being expressed, what regions of DNA ("chromatin") are active ("open") or bound by specific proteins.

COMS E4762 Machine Learning for Functional Genomics. 3.00 points.

This course will introduce modern probabilistic machine learning methods using applications in data analysis tasks from functional genomics, where massively-parallel sequencing is used to measure the state of cells: e.g. what genes are being expressed, what regions of DNA ("chromatin") are active ("open") or bound by specific proteins

Fall 2025: COMS E4762

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|---------------|--------|------------|
| COMS 4762 | 001/12852 | F 1:10pm - 3:40pm 451 Computer Science Bldg | David Knowles | 3.00 | 91/100 |
| COMS 4762 | V01/20354 | | David Knowles | 3.00 | 2/99 |

COMS W4772 ADVANCED MACHINE LEARNING. 3.00 points.

Lect: 3.

Prerequisites: (COMS W4771) or COMS W4771; Instructor's permission; knowledge of linear algebra & introductory probability or statistics is required.

An exploration of advanced machine learning tools for perception and behavior learning. How can machines perceive, learn from, and classify human activity computationally? Topics include appearance-based models, principal and independent components analysis, dimensionality reduction, kernel methods, manifold learning, latent models, regression, classification, Bayesian methods, maximum entropy methods, real-time tracking, extended Kalman filters, time series prediction, hidden Markov models, factorial HMMs, input-output HMMs, Markov random fields, variational methods, dynamic Bayesian networks, and Gaussian/Dirichlet processes. Links to cognitive science

COMS W4773 Machine Learning Theory. 3 points.

Prerequisites: COMS W4771

Core topics from unsupervised learning such as clustering, dimensionality reduction and density estimation will be studied in detail. Topics in clustering: k-means clustering, hierarchical clustering, spectral clustering, clustering with various forms of feedback, good initialization techniques and convergence analysis of various clustering procedures. Topics in dimensionality reduction: linear techniques such as PCA, ICA, Factor Analysis, Random Projections, non-linear techniques such as LLE, IsoMap, Laplacian Eigenmaps, tSNE, and study of embeddings of general metric spaces, what sorts of theoretical guarantees can one provide about such techniques. Miscellaneous topics: design and analysis of data structures for fast Nearest Neighbor search such as Cover Trees and LSH. Algorithms will be implemented in either Matlab or Python.

COMS E4773 Machine Learning Theory. 3.00 points.

Theoretical study of algorithms for machine learning and high-dimensional data analysis. Topics include high-dimensional probability, theory of generalization and statistical learning, online learning and optimization, spectral analysis

COMS W4774 Unsupervised Learning. 3.00 points.

Prerequisites: COMS W4771 Background in probability and statistics, linear algebra, and multivariate calculus. Ability to program in a high-level language, and familiarity with basic algorithm design and coding principles

Core topics from unsupervised learning such as clustering, dimensionality reduction and density estimation will be studied in detail. Topics in clustering: k-means clustering, hierarchical clustering, spectral clustering, clustering with various forms of feedback, good initialization techniques and convergence analysis of various clustering procedures. Topics in dimensionality reduction: linear techniques such as PCA, ICA, Factor Analysis, Random Projections, non-linear techniques such as LLE, IsoMap, Laplacian Eigenmaps, tSNE, and study of embeddings of general metric spaces, what sorts of theoretical guarantees can one provide about such techniques. Miscellaneous topics: design and analysis of datastructures for fast Nearest Neighbor search such as Cover Trees and LSH. Algorithms will be implemented in either Matlab or Python.

Fall 2025: COMS W4774

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|--|-------------|--------|------------|
| COMS 4774 | 001/12855 | T Th 1:10pm - 2:25pm 301 Pupin Laboratories | Nakul Verma | 3.00 | 46/110 |

COMS W4775 Causal Inference. 3.00 points.

Prerequisites: COMS W4771 Discrete Math, Calculus, Statistics basic probability, modeling, experimental design, Some programming experience

Causal Inference theory and applications. The theoretical topics include the 3-layer causal hierarchy, causal bayesian networks, structural learning, the identification problem and the do-calculus, linear identifiability, bounding, and counterfactual analysis. The applied part includes intersection with statistics, the empirical-data sciences (social and health), and AI and ML.

Fall 2025: COMS W4775

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|------------------|--------|------------|
| COMS 4775 | 001/13753 | M W 4:10pm - 5:25pm 750 Schapiro Cepsr | Elias Bareinboim | 3.00 | 26/60 |

COMS E4775 Causal Inference. 3 points.

Prerequisites: (COMS4711W) and

Causal Inference theory and applications. The theoretical topics include the 3-layer causal hierarchy, causal bayesian networks, structural learning, the identification problem and the do-calculus, linear identifiability, bounding, and counterfactual analysis. The applied part includes intersection with statistics, the empirical-data sciences (social and health), and AI and ML.

COMS W4776 Machine Learning for Data Science. 3 points.

Lect.: 3

Prerequisites: (STAT GU4001 or IEOR E4150) and SIEO W3600 or W4150 or equivalent.

Introduction to machine learning, emphasis on data science.

Topics include least square methods, Gaussian distributions, linear classification, linear regression, maximum likelihood, exponential family distributions, Bayesian networks, Bayesian inference, mixture models, the EM algorithm, graphical models, hidden Markov models, support vector machines kernel methods. Emphasizes methods and problems relevant to big data. Students may not receive credit for both COMS W4771 and W4776.

COMS E4776 Neural Networks # Deep Learning. 3.00 points.

Prerequisites: (COMS W4771) and (COMS W3251 or MATH UN2010 or MATH UN2015) and (STAT UN1201 or STAT GU4001 or STAT GU4203 or IEOR E3658 or MATH UN2015)

Foundational concepts, methods, applications, and recent advances in neural network algorithms.

Fall 2025: COMS E4776

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|---------------|--------|------------|
| COMS 4776 | 001/13751 | T Th 2:40pm - 3:55pm 833 Seeley W. Mudd Building | Richard Zemel | 3.00 | 100/120 |
| COMS 4776 | V01/17916 | | Richard Zemel | 3.00 | 17/99 |

COMS W4824 COMPUTER ARCHITECTURE. 3.00 points.**COMS W4835 COMPUTER ORGANIZATION II. 3.00 points.****COMS W4841 INTRO TO VLSI SYSTEMS. 3.00 points.****COMS E4899 Research Training. 0.00 points.**

Research training course. Recommended in preparation for laboratory related research

COMS W4901 Projects in Computer Science. 1-3 points.

Prerequisites: Approval by a faculty member who agrees to supervise the work.

A second-level independent project involving laboratory work, computer programming, analytical investigation, or engineering design. May be repeated for credit, but not for a total of more than 3 points of degree credit. Consult the department for section assignment.

COMS W4910 CURRICULAR PRACTICAL TRAINING. 1.00 point.**COMS W4975 Topics in Natural Language Processing. 3.00 points.**

Prerequisites: (COMS W4705)

Selected topics in Natural Language Processing. Content and prerequisites vary between sections and semesters. May be repeated for credit. Check the "topics courses" webpage on the department website for more information on each section.

COMS E4995 COMPUTER ARTS/VIDEO GAMES. 3.00 points.

Special topics arranged as the need and availability arises. Topics are usually offered on a one-time basis. Since the content of this course changes each time it is offered, it may be repeated for credit. Consult the department for section assignment

COMS W4995 TOPICS IN COMPUTER SCIENCE. 3.00 points.

Lect: 3.

Selected topics in computer science. Content and prerequisites vary between sections and semesters. May be repeated for credit. Check "topics course" webpage on the department website for more information on each section

COMS W4996 Special topics in computer science, II. 3 points.

Lect: 3. Not offered during 2024-2025 academic year.

Prerequisites: Instructor's permission.

A continuation of COMS W4995 when the special topic extends over two terms.

Computer Science - Electrical Engineering**CSEE W3826 FUNDAMENTALS OF COMPUTER ORG. 3.00 points.****CSEE W3827 FUNDAMENTALS OF COMPUTER SYSTS. 3.00 points.**

Lect: 3.

Prerequisites: An introductory programming course.

Corequisites: ELEN E3082

Fundamentals of computer organization and digital logic. Boolean algebra, Karnaugh maps, basic gates and components, flipflops and latches, counters and state machines, basics of combinational and sequential digital design. Assembly language, instruction sets, ALU's, single-cycle and multi-cycle processor design, introduction to pipelined processors, caches, and virtual memory.

CSEE W4121 COMPUTER SYSTEMS FOR DATA SCIENCE. 3.00 points.

Prerequisites: Background in Computer System Organization and good working knowledge of C/C++. CSOR W4246 Algorithms for Data Science, STAT W4203 Probability Theory, or equivalent as approved by faculty advisor.

An introduction to computer architecture and distributed systems with an emphasis on warehouse scale computing systems. Topics will include fundamental tradeoffs in computer systems, hardware and software techniques for exploiting instruction-level parallelism, data-level parallelism and task level parallelism, scheduling, caching, prefetching, network and memory architecture, latency and throughput optimizations, specialization, and an introduction to programming data center computers

Spring 2026: CSEE W4121

CSEE W4140 NETWORKING LABORATORY. 3.00 points.

Lect: 3.

Prerequisites: (CSEE W4119) or CSEE W4119; or equivalent. In this course, students will learn how to put principles into practice, in a hands-on-networking lab course. The course will cover the technologies and protocols of the Internet using equipment currently available to large internet service providers such as CISCO routers and end systems. A set of laboratory experiments will provide hands-on experience with engineering wide-area networks and will familiarize students with the Internet Protocol (IP), Address Resolution Protocol (ARP), Internet Control Message Protocol (ICMP), User Datagram Protocol (UDP) and Transmission Control Protocol (TCP), the Domain Name System (DNS), routing protocols (RIP, OSPF, BGP), network management protocols (SNMP, and application-level protocols (FTP, TELNET, SMTP)

CSEE W4823 Advanced Logic Design. 3 points.

Lect: 3.

Prerequisites: (CSEE W3827) or CSEE W3827; Or a half semester introduction to digital logic, or the equivalent.

An introduction to modern digital system design. Advanced topics in digital logic: controller synthesis (Mealy and Moore machines); adders and multipliers; structured logic blocks (PLDs, PALs, ROMs); iterative circuits. Modern design methodology: register transfer level modelling (RTL); algorithmic state machines (ASMs); introduction to hardware description languages (VHDL or Verilog); system-level modelling and simulation; design examples.

CSEE W4824 COMPUTER ARCHITECTURE. 3.00 points.

Lect: 3.

Prerequisites: (CSEE W3827) or CSEE W3827

Focuses on advanced topics in computer architecture, illustrated by case studies from classic and modern processors. Fundamentals of quantitative analysis. Pipelining. Memory hierarchy design. Instruction-level and thread-level parallelism. Data-level parallelism and graphics processing units. Multiprocessors. Cache coherence. Interconnection networks. Multi-core processors and systems-on-chip. Platform architectures for embedded, mobile, and cloud computing

Fall 2025: CSEE W4824

CSEE W4840 EMBEDDED SYSTEMS. 3.00 points.

Lect: 3.

Prerequisites: (CSEE W4823) CSEE W4823

Embedded system design and implementation combining hardware and software. I/O, interfacing, and peripherals. Weekly laboratory sessions and term project on design of a microprocessor-based embedded system including at least one custom peripheral. Knowledge of C programming and digital logic required

Spring 2026: CSEE W4840

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |

| CSEE 4840 | 001/12397 | M W 1:10pm - 2:25pm 451 Computer Science Bldg | Stephen Edwards | 3.00 | 105/110 |

CSEE W4868 SYSTEM-ON-CHIP PLATFORMS. 3.00 points.

Prerequisites: (COMS W3157) and (CSEE W3827) COMS W3157 AND CSEE W3827

Design and programming of System-on-Chip (SoC) platforms. Topics include: overview of technology and economic trends, methodologies and supporting CAD tools for system-level design, models of computation, the SystemC language, transaction-level modeling, software simulation and virtual platforms, hardware-software partitioning, high-level synthesis, system programming and device drivers, on-chip communication, memory organization, power management and optimization, integration of programmable processor cores and specialized accelerators. Case studies of modern SoC platforms for various classes of applications

Fall 2025: CSEE W4868

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|--------------|--------|------------|
| CSEE 4868 | 001/12881 | T Th 11:40am - 12:55pm 451 Computer Science Bldg | Luca Carloni | 3.00 | 62/60 |

Computer Science - Biomedical Engineering

CBMF W4761 COMPUTATIONAL GENOMICS. 3.00 points.

Lect: 3.

Prerequisites: Working knowledge of at least one programming language, and some background in probability and statistics.

Computational techniques for analyzing genomic data including DNA, RNA, protein and gene expression data. Basic concepts in molecular biology relevant to these analyses. Emphasis on techniques from artificial intelligence and machine learning. String-matching algorithms, dynamic programming, hidden Markov models, expectation-maximization, neural networks, clustering algorithms, support vector machines. Students with life sciences backgrounds who satisfy the prerequisites are encouraged to enroll

Spring 2026: CBFM W4761

| Course Number | Section/Call Number | Times/Location | Instructor | Points | Enrollment |
|---------------|---------------------|---|-------------------|--------|------------|
| CBMF 4761 | 001/12331 | M W 5:40pm - 6:55pm 209 Havemeyer Hall | Cassandra Burdzik | 3.00 | 66/60 |
